JavaScript, TypeScript,
Flow, Bash, Lua, Go.

Angular, Next.js, React, NgRx, Redux/Toolkit, TanStack Query, React Hook Form, Zod, React Router, use-query-params, RxJS, Lodash, dnd kit, Axios, PixiJS, Jest, Vitest, Testing Library, Mock Service Worker, Puppeteer, Playwright, SCSS, SASS, Less, Emotion, styled-components, MUI, Storybook.

ESLint (created rules), webpack, gulp, Husky, Lerna, Node.js, Linux, Docker.

CircleCI, GitHub Actions, Sentry, Datadog, LaunchDarkly, MongoDB; AWS: S3, CodePipeline, Lambda.

Agentic & AI-assisted development, i18n/l10n, micro-front-end, design systems, REST API.

Front-end engineer bringing **over 7 years of experience** building customer-facing and internal products. UI/UX enthusiast with a testing-first approach and a focus on reliability & observability. Track record of measurable wins through lower tooling costs, faster debugging cycles, and smoother user flows.

Front-End Software Engineer @ Wolt

Tallinn, Estonia | Nov '25–Mar '26 · 4 mos

- Built internal support tooling used by 10k+ agents across dozens of regions.
- Next.js, JavaScript, TypeScript, React, TanStack Query, React Hook Form, Zod, React Router, use-query-params, Lodash, Axios, Jest, Vitest, Testing Library, Mock Service Worker, Playwright, styled-components, Storybook, ESLint, webpack, Husky, GitHub Actions, Sentry, Datadog, MongoDB, Agentic & AI-assisted development, i18n, micro-front-end, design systems, REST API.

Front-End Software Engineer @ Kitman Labs

Dublin, Ireland | Apr '23–Oct '25 · 2 yrs 7 mos

- Led development of a key feature in a customer-facing health & performance intelligence platform.
- Reduced Sentry spending by 29%** by triaging top noise sources and tuning filters to cut false positives.
- Reworked proxying to allow direct local connections to staging and production, **cutting CircleCI spend by 17%** and **shrinking average debug loop from 3 hours to 20 minutes**.
- Designed per-tab, per-user session restoration for hybrid SPA/MPA setup, **ensuring retention for 45 key clients**.

JavaScript, Flow, Bash, React, Redux/Toolkit, React Router, Lodash, dnd kit, Axios, PixiJS, Jest, Testing Library, Mock Service Worker, Playwright, SCSS, Emotion, MUI, Storybook, ESLint, webpack, gulp, Husky, Lerna, Node.js, Docker, CircleCI, Sentry, Datadog, LaunchDarkly, AWS S3, AI-assisted development, i18n, design systems, REST API.

Front-End Software Engineer @ Ryanair

Dublin, Ireland | Jun '22–Mar '23 · 10 mos

- Enhanced the core functionality of the website, making the UX of the flight widget more intuitive.
- Reduced the number of clicks by 12%** by prefetching adjacent-month flight data in [the timetable](#).

JavaScript, TypeScript, Angular, NgRx, RxJS, Lodash, Jest, Playwright, SCSS, Storybook, ESLint, webpack, Husky, Lerna, Node.js, LaunchDarkly; AWS: Lambda, CodePipeline; i18n/l10n, micro-front-end, REST API.

Middle Front-End Engineer @ Capgemini Engineering

Odessa, Ukraine | Nov '20–Jun '22 · 1 yr 8 mos

- Developed a blockchain-based acceptance system for a major telecom provider where I owned the image viewing module.
- Mentored 3 junior developers** on Angular and TypeScript, accelerating their onboarding and enabling them to independently contribute to the codebase within two months.

JavaScript, TypeScript, Bash, Go, Angular, React, NgRx, RxJS, Lodash, SCSS, SASS, Less, Storybook, ESLint, webpack, Node.js, LaunchDarkly; AWS: S3, Lambda; REST API.

Open Source Activity

Apr '20–Mar '26 · 4 yrs 8 mos

- Created [gouse](#), a developer tool to toggle 'declared and not used' errors, and a companion [plugin](#) for Visual Studio Code, Cursor, Windsurf, Google Antigravity, Kiro, Trae, Void **with over 1 000 downloads**, and another [plugin](#) for IntelliJ IDEA family.

JavaScript, TypeScript, Go, Angular, Node.js, VS Code plugin development, REST API.

Junior Front-End Engineer @ Teradek

Odessa, Ukraine | Aug '19–Nov '20 · 1 yr 4 mos

- Designed and implemented a front-end-only algorithm for [IFB](#) protocol connection detection for our in-house developed devices.
- Developed Node.js crawlers for network device configuration analysis.

JavaScript, TypeScript, Bash, Angular, RxJS, Lodash, PixiJS, Puppeteer, SCSS, Node.js, Linux, AWS S3, design systems.
